

## When should I get tested?

---

### You should get tested if:

- You have symptoms of COVID-19
- You have been in close contact with someone confirmed to have COVID-19
- You have taken part in activities that put you at a higher risk of COVID-19 infection including:
  - Traveling
  - Attending large social or mass gatherings
  - Being in crowded or poorly ventilated indoor settings

## Should I get tested if I am fully vaccinated?

---

If you are fully vaccinated you should get tested 5-7 days following an exposure even if you do not experience signs or symptoms of COVID-19.

**If you have signs or symptoms of COVID-19, you should get tested regardless of vaccination status or prior infection.**

For more details about COVID-19 testing in Rock County, visit the Rock County Public Health Department website.

Questions? Call 608-757-5440

To find a COVID-19 vaccine provider, visit [Vaccines.gov](https://www.vaccines.gov) or call 211.

# Rock County COVID-19 Testing Information

---

Public Health

Revised 5/17/2022

## Where can I get tested?

### At Home Test Kits\*

- Every home in the United States is eligible for 2 sets of 4 free at-home test kits  
<https://www.covidtests.gov/>
- Buy a kit in store or online from retail stores like Walgreens, CVS, or Walmart

\*If you test positive contact your local health department for further instructions.

### Free Test Sites

Most community test sites and pharmacies offer testing at no charge to the patient. Please call ahead or visit each location's website for more information.

### Community Test Sites

### Other Providers

- Community Health Systems, Beloit  
(608) 361-0311  
<https://www.chsofwi.org/drive-thru-services/>
- The Doctor's Office  
(608) 713-0472  
<https://www.visitthedoctorsoffice.com/covid-19/>

## What should I do while waiting for my test results?

- Stay home and monitor your health
  - Stay away from others, especially those at higher risk of getting sick
- Trace the spread of infection
  - Gather a list of contacts and approximate times you were in contact with other individuals

- Answer calls from your health department
  - Help public health professionals with contact tracing to slow the spread of infection in your community

## What should I do if I test positive?

- Isolate at home for at least 5 days
- If you develop symptoms, isolate until you are fever-free and your symptoms are improving
- Wear a well-fitted mask for 10 full days, avoid travel, and avoid people who are at high risk
- If you are experiencing life-threatening symptoms, seek emergency care immediately
